Report on

A.I DEMO DAY

Organized by

Department of M.C.A

St. Philomena's College (Autonomous), Mysore

Session Details

Date: 23rd May, 2026

Time: 10.00A.M to 1.00 P.M

Venue: M.C.A Conference Hall, 2nd Floor, PG Block

Resource Person

Ms. Nagashree S

Senior Systems Analyst – Deployments Lead,

G10X Technology Pvt. Ltd.,

Bengaluru

Event Convener

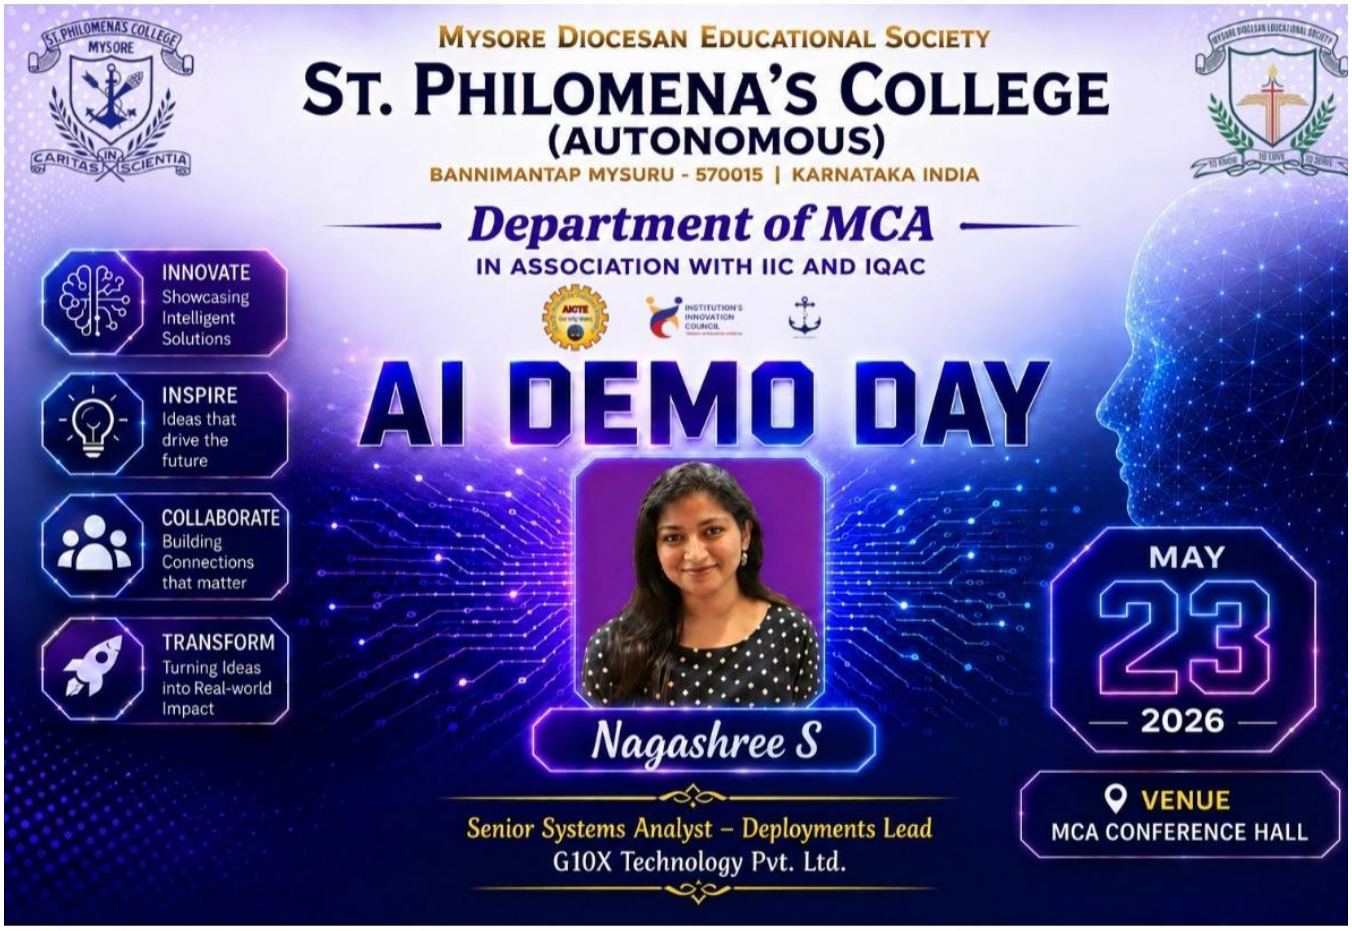

Ms. Reena Mol V U

Faculty Coordinators

Mr. Shiva Kumar C

Ms. Bindushree K

Mr. Roshan Roy D'Souza

REPORT ON A.I DEMO DAY

AI Demo Day was successfully conducted on May 23, 2026, at 10:00 AM in the M.C.A Conference Hall, 2nd Floor, PG Block. The session was hosted by the M.C.A Department of St. Philomena's College (Autonomous), Mysore, and was judged by Ms. Nagashree S, Senior Systems Analyst – Deployments Lead, G10X Technology Pvt. Ltd., Bengaluru.

Objective

The primary objective of the event was to provide M.C.A students with practical exposure to developing real-world applications using Artificial Intelligence (A.I.) and to inspire them to apply their creativity in building innovative solutions that benefit society. The event also aimed to offer valuable insights into real-world software development practices, enabling students to understand industry standards and motivating them to design efficient, reliable, and high-quality software solutions.

Introduction

In today's rapidly evolving era of Artificial Intelligence (A.I.), it is essential for students to understand how to transform their coding knowledge into successful and fully functional A.I.-based applications. The event provided participants with valuable insights into the complete journey of software development — from ideation and coding to execution and successful project completion. The session also emphasized the importance of effective programming practices, debugging, testing, problem-solving, and continuous learning in developing efficient, reliable, and impactful A.I. applications.

The participants of the event were first-year MCA students. Ms. Nagashree S who was invited as the judge for the event, considering her expertise in software development practices and project execution, highlighted the significance of proper problem formulation, societal relevance of applications, effective communication skills, innovation, and practical implementation of real-world solutions. Her insightful feedback encouraged the students to develop more innovative and socially beneficial applications in the future.

Inaugural Session

The session began with a formal inauguration, graced by the presence of esteemed dignitaries including:

- Rev. Fr. Dr. Lourdu Prasad Joseph, Rector & Manager
- Dr. Ravi J.D Saldhana, Principal
- Rev. Fr. Roshan S, Finance Officer
- Rev. Fr. David Sagayaraj, Assistant to the Rector
- Mr. Ronald Prakash Cutinha, Vice Principal
- Mrs. Reena Mol V U, Head, Dept. of M.C.A
- Ms. Nagashree S, Chief Guest

The session was gracefully hosted by **Ms. Rebecca Raj A**., first-year M.C.A. student. The event commenced with the rendition of the Philo's Anthem, setting a dignified and enthusiastic tone for the event. The welcome address was delivered by **Ms. Gunashree M**., first-year M.C.A. student, following which the esteemed judge was formally introduced by **Mr. Shiva Kumar C**., Assistant Professor, Department of M.C.A.

Ms. Bindushree K., Assistant Professor, Department of M.C.A., addressed the gathering and shared the vision and objectives of the A.I. Demo Day. The event was further enriched by the presence of **Rev. Fr. Lourdu Prasad Joseph**, Rector, who officially inaugurated the A.I. chatbot developed for the college website. In his address, he encouraged students to channel their creativity and innovative ideas into meaningful and impactful products that benefit society.

The session concluded with a vote of thanks delivered by **Ms. Deepika D**., first-year M.C.A. student, who expressed heartfelt gratitude to the judge, Ms. Nagashree S., the faculty members, and all the participants for their enthusiastic involvement and valuable contributions in making the event a grand success.

Session Overview

The demonstration of the A.I. projects developed by the students was conducted in the Activity Room. The event was witnessed by Rev. Fr. Dr. Lourdu Prasad Joseph, Rector & Manager; Dr. Ravi J.D. Saldhana, Principal; Rev. Fr. Roshan S., Finance Officer; Rev. Fr. David Sagayaraj, Assistant to the Rector; and Mr. Ronald Prakash Cutinha, Vice Principal. The dignitaries observed the live demonstrations of the student-developed A.I. projects and highly appreciated the students' creativity, technical skills, and innovative efforts.

The projects demonstrated during the event included an A.I. Chatbot, Student Drowsiness Detection System, A.I.-Powered Business Assistant, On-Screen Monitoring System, Stress Detection A.I., LectureScripts A.I., and Sympto Scan A.I. The projects were efficiently evaluated by Ms. Nagashree S., who interacted with the participants and assessed their understanding through insightful and thought-provoking questions.

The event also witnessed the participation of 73 students and faculty members from various postgraduate departments, who visited the venue to explore the innovative A.I.-based projects developed by the students. The demonstrations provided the audience with valuable exposure to how modern A.I. technologies can be applied to address real-world problems and transformed into practical, fully functional solutions.

The Valedictory Session of the event began with an insightful feedback session by the judge, **Ms. Nagashree S.**, who appreciated the students for successfully developing innovative A.I. projects within a short span of time. She also provided valuable suggestions on how the projects could be further enhanced and refined into impactful products that would better serve society by addressing more meaningful and practical real-world problems.

The session was further led by **Mr. Roshan Roy D'Souza**, Assistant Professor, Department of M.C.A., who announced the winners based on the evaluation and scores awarded by the judge. The project titled "On-Screen Monitoring System" secured the first place, while "Sympto Scan A.I." and "A.I. Chatbot" won the second and third places respectively. The event formally concluded with the rendition of the National Anthem, marking the successful completion of the A.I. Demo Day.

Conclusion

The one-day event *"***A.I. Demo Day***"* was a grand success, successfully achieving its objective of encouraging students to transform their creativity, innovative ideas, and coding abilities into complete and functional A.I.-based software applications. The event provided students with a valuable opportunity to showcase their technical talents and practical understanding of Artificial Intelligence through the development of real-world applications. The systematic evaluation and constructive feedback provided by **Ms. Nagashree S** enabled students to gain deeper insights into effective programming practices, debugging, testing methodologies, project execution, and the growing significance of A.I. in today's technology-driven world. Her guidance motivated students to strengthen their coding skills, improve logical and analytical thinking, and focus on identifying meaningful real-world problems and developing practical solutions for them. The event served as an excellent platform for experiential learning, innovation, and collaboration, inspiring students to enhance their technical competencies and prepare themselves for successful careers in the field of technology and software development. Furthermore, it encouraged participants to adopt a problem-solving mindset and emphasized the importance of continuous learning and adaptability in the rapidly evolving domain of Artificial Intelligence.
