Before we began the syllabus of the 1st semester our faculties conducted bridge course . This was very effective for me and my batch mates , because there will long between under graduation and post graduation classes. The bridge course idea was very helpful to remind most of the basics which were from PUC and UG.

Our faculties taught about basics of vector algebra , integration , differentiation , even a small concepts.

These basics were helpful in classical mechanics, MMP, especially in tensor calculus.

Bridge course basics were also helpful for KSET , NET.
