Report on One-Day Seminar

A one-day seminar on "Seminar on Information & Knowledge Management using Big Data Computing: Challenges and Research Opportunities" was organized at the Auditorium Hall on Tuesday, January 10, 2017, Organized by PG. Department of Computer Science.

The resources person was Prof. Jemal H. Abawajy, Director, Distributed System and Security Research cluster, Deakin University, Australia. The seminar bring together Academicians, Researchers, IT Professionals, and Students to share and discuss both theoretical and practical knowledge and information management using Big Data. The seminar helped to close the gaps between those who collect the data (data providers), those who could benefit from using the data (domain experts), and those who are capable of developing the methods for storing/managing/processing the data (technology enablers).

Prof.M.Krishne Gowda while welcoming the gathering said that we are living today in exciting time in which the world has become more connected than ever before. It is the software industry which has made the real changes, new needs, and drove the high-tech industry to new heights.

Delivering the keynote address, Prof. Jemal, suggested that Big Data brings impeccable benefits to our society by using agriculture sector as an example he said that " Big Data can transform the conventional decision that is based on the skills of farmer to data driven decision based objective information"

Prof. G.Hemanth Kumar, while addressing the gathering stressed on the significance of bringing together researchers from the multidisciplinary fields of data management and analytics; and pervasive computing towards using big data for better decision making and problem solving.

The Rector Rev. Fr. Leslie Moras, in his Presidential Address emphasised that Big Data has the potential to revolutionize not just research, but also education, health and many other fields. He stressed on establishing and fostering coordination and collaboration for interdisciplinary research programmes on Big Data issues. Dr. A. Basit Darem proposed the vote of thank.

The seminar highlighted many areas related to Big Data and its benefit and application to society. More than 200 students, research scholars and teachers from different college inside and outside Mysore participated in the seminar.

It was a learning and interactive session for the students where he answered all the queries put up by the students to their full satisfaction. The seminar was fruitful for all the participants from different level of education who interacted with the resource person and have discussion during and after the seminar.
