Restoration and Usage of Purified Drinking Water Facility

This is to bring to the notice of all staff and students that the **Centralized Purified Drinking Water System**, which had been defunct for a considerable period, has now been fully restored, renovated and thrown open to the Philomenites on 06th February 2026.

Acting upon the strategic recommendation of the **Internal Quality Assurance Cell (IQAC)** and the **Students and Staff Welfare Officer**, College Management has prioritized this restoration to ensure the health and well-being of all our stakeholders. We recognize that access to clean drinking water is a fundamental necessity for a conducive learning environment.

Attention:

- While the renovated facility will undergo formal official inauguration shortly, it is being opened for immediate use to cater to the needs of the campus.
- This system serves as an additional facility to the existing supply of pure Kaveri water, which continues to be provided via cans and dispensers placed at strategic points throughout the college.
- Students and staff members are earnestly requested to use this facility **judiciously**. Prevent water wastage and maintain the cleanliness of the surrounding area.
- Kindly avoid using single-use plastic cups; use of reusable bottles is encouraged to support our "Green Campus" initiative.

The management remains committed to the continuous improvement of campus infrastructure for the benefit of the Philomenites community.

Stay Hydrated, Stay Healthy.

Principal **Rector**
