Report on

INSIGHTS ON CODING

Organized by

MCA Department

St. Philomena's College (Autonomous), Mysore

Workshop Details

Date: 25th October 2024 (Friday)

Time: 9:30 AM – 4:30 PM

Venue: Room No 56

Resource Person

Mr. Mohammed Idris M.Z

Trainer & Software Developer Skill Bout

Mysore Diocesan Educational Society (Regd).

St. Philomena's College (Autonomous)

Affiliated College to the University of Mysore

Reaccredited by NAAC with B++ in 3rd Cycle

Department of MCA organizes a One Day Workshop on

INSIGHTS ON CODING

Mohammed Idris M.Z

Trainer & Software Developer

Skill Bout

Starts From
09:00am

Friday
25th October, 2024

Room No 56, 2nd Floor, PG Block

REPORT ON THE “ONE-DAY CODING WORKSHOP”

The "One-Day Coding Workshop" was held on 25th October 2024 from 9.30 AM to 4.30 PM, organized by the MCA Department of St. Philomena's College (Autonomous), Mysore. The workshop, conducted by Mr. Mohammed Idris, founder of Skill Bout Professional Services, aimed to enhance the programming skills of the students.

Objective

The session was designed to provide hands-on coding experience, encourage peer learning, and equip students with valuable techniques for their future academic projects.

Introduction

This workshop was organized in response to the growing interest among students in programming and the need for additional resources to support their learning. With rapid advancements in technology, it was evident that students required more opportunities to practice coding and stay updated with current trends and tools.

The participants were primarily first-year students from the MCA Department. Mr. Mohammed Idris was selected to guide students in building foundational programming skills early in their academic journey. The session also aimed to foster a broader appreciation for programming.

Morning Session

The morning session was conducted by Mr. Mohammed Idris, who introduced participants to programming logic. This interactive session included live coding demonstrations and practical exercises. The students engaged in hands-on coding activities and interactive challenges, focusing on programming logic and Java. The exercises promoted critical thinking and problem-solving skills. He also shared valuable industry experiences and tips, inspiring students to pursue coding with confidence.

Afternoon Session

The afternoon session was dedicated to an in-depth workshop on Java, one of the most widely used programming languages in the industry. The session aimed to provide comprehensive knowledge of Java programming.

The workshop began with an introduction to Java, emphasizing its significance in software development, mobile applications, and enterprise solutions. He highlighted Java's object-oriented nature and platform independence, making it a popular choice among developers.

Students were guided through core Java concepts, including:

- ☐ Data types and variables
- ☐ Control structures (if statements, loops)
- ☐ Methods and functions
- ☐ Object-oriented programming principles (classes, objects, inheritance, polymorphism)

The session also included an interactive Q&A segment, where students had the opportunity to ask questions about Java programming, best practices, and real-world applications. This segment was particularly engaging for the participants.

Feedback

Feedback collected after the workshop was invaluable in assessing the event's effectiveness and areas for improvement. Students were encouraged to share their thoughts through feedback forms. The responses were overwhelmingly positive, with several constructive suggestions for future events.

Conclusion

The one-day coding workshop was a resounding success, achieving its primary objective of enhancing students' coding skills. With a well-structured agenda and engaging sessions led by a knowledgeable speaker, students were able to immerse themselves in coding logic and gain valuable insights into programming concepts.

In summary, the workshop not only served as a platform for improving programming skills but also fostered a deeper understanding of programming logic among aspiring coders. We are excited about the potential for future events and are committed to providing ongoing opportunities for learning and growth in the realm of programming.
