SEMINAR ON PLANT AND ANIMAL DISEASES AND THEIR MANAGEMENT

ORGANISED BY: BOTANY AND ZOOLOGY DEPARTMENT

HELD ON: 29-6-17 (Thursday)

A one day seminar on plant and animal diseases and their management was organised by Botany and Zoology departments jointly.

OBJECTIVES- Animal and Plant diseases pose a serious and continuing threat to found security, food safety, national economics, biodiversity and the rural environment. New challenges include climate change, regularity developments changes in geographic concentration, size of life stock holdings etc..

Hence, this seminar was conducted with the following objectives in mind.

1. To create awareness among the participants about common diseases in plants and animals.
2. To educate them about the mode of infection, symptoms, spread from plants and animals to humans and its impact on human health.
3. More important, to develop an insight into the management of these diseases so that they in turn can educate their neighbours and friends.

I Session- Dr. Javeed Nayeem

Topic- Disease and their management on humans.

II Session- Dr. Vasath Kumar

Topic- Plant diseases, spread and impact on man.

III Session – Captain Dr. Thimaiah (Vet)

Topic- Common animal diseases with special references to zoonotic importance.

Feed Back- From the feed backs obtained, all the 3 lectures were good and informative.

Participants have suggested to conduct more seminars on similar topics.

Requested us to take them out to labs and fields for further study.
