# ST. PHILOMENA'S COLLEGE
## (AUTONOMOUS), MYSORE

(Recognized as College of Excellence (UGC) | Reaccredited by NAAC with 'B++' Grade
Approved by AICTE and affiliated with the University of Mysore)

**Workshop on**

# Harnessing VIDWAN and IRINS for Research Visibility, Viability and Reliability

*Building a Credible, Discoverable and Trustworthy Research Profile*

**Resource Person**

**Dr. Sunil M.V.,**
Faculty – Systems & General Management,
SDM Institute for Management Development (SDMIMD), Mysuru

**Organised by**

**Central Library, in collaboration with RDC, IQAC and IIC, St. Philomena's College (Autonomous), Mysore**

**Target Audience**
Faculty members of St. Philomena's College (Autoomeous)

**Date and Time**
26-09-2026 (Saturday), 11:00 AM to 1:30 PM

**Duration / Mode**
2 Hours | In-person, interactive, demonstration-based and hands-on

**Venue**
LG Auditorium

## About the Workshop

A researcher's impact today is judged not only by the quality of the work but by how visibly, credibly and verifiably it is presented online. This workshop helps faculty build a research profile that is **Visible** (easy to find), **Viable** (recognised by evaluators) and **Reliable** (safe from predatory practices) – anchored by India's two national research-information platforms, **VIDWAN** and **IRINS** (INFLIBNET), and connected to global identifiers such as ORCID, Scopus and Google Scholar. Faculty will leave with live, updated profiles and a practical framework to sustain them, directly supporting the College's NAAC and **NIRF** research-data readiness.

## Three Pillars of a Credible Research Profile

### VISIBILITY
**Can the world find you?**

- Claiming and syncing ORCID, Scopus, VIDWAN and Google Scholar IDs; hands-on VIDWAN/IRINS profile creation; extending reach via scholarly networks and open-access repositories.

### VIABILITY
**Does your work count?**

- Author-level metrics (h-index, citations) and journal-level metrics; (JIF, CiteScore, quartiles); altmetrics; how tenure, funding and ranking bodies actually use them.

### RELIABILITY
**Can it be trusted?**

- Spotting predatory and hijacked journals, fake editorial boards, paper mills and metric gaming; a practical checklist to vet a journal before submission.

## Workshop Objectives

1. Build and synchronise **VIDWAN** and IRINS profiles across ORCID, Scopus, Google Scholar and VIDWAN for a single, unambiguous digital identity.
2. **Improve discoverability** of publications, projects and achievements through keywords, metadata and open-access depositories.
3. Introduce author- and journal-level metrics (h-index, citations) and journal-level metrics (JIF, CiteScore, quartiles), and how they drive promotion, funding and rankings decisions.
4. Build safeguards against academic malpractice – predatory and hijacked journals, paper mills and metric gaming – through a pre-submission checklist.
5. Enable collaboration using IRINS analytics to identify peer networks, research trends and potential co-authors.
6. Deliver immediate, practical outcomes through hands-on updating of live profiles during the session, so every participant leaves with tangible progress.

## Methodology

- **Orientation:** to the digital research-identity landscape and the VIDWAN–IRINS ecosystem.
- **Live demonstration:** of VIDWAN and IRINS – profile creation, ID-linking and analytics.
- **Hands-on lab:** participants update their own profiles in real time (laptop and updated CV/publication list required).
- **Q&A and support:** for individual troubleshooting of profile-management issues.

## About the Resource Person

Dr. Sunil M.V. is a faculty member in Systems & General Management at the SDM Institute for Management Development (SDMIMD), Mysuru, where he teaches postgraduate management students and is active in academic research, case writing and faculty-development facilitation. He regularly conducts sessions on research visibility, publication strategy and digital academic identity for faculty across institutions, combining conceptual grounding with hands-on, profile-level demonstration.

## Expected Outcomes

- Updated, synchronised VIDWAN, IRINS, ORCID and Scopus profiles for every participating faculty member.
- Greater confidence in using research metrics and avoiding predatory journals.
- Stronger, more accurate research documentation supporting institutional NAAC and NIRF data readiness.
- A sustainable culture of digital research visibility and academic networking at the College.

## Participant Requirements

- Bring a laptop with an updated CV or complete publication list, in digital form.
- Keep existing login credentials (ORCID, Scopus) handy, whenever already available.
- Venue to provide: stable internet connectivity and projection facilities for the hands-on component.
