World Vulture Conservation Day Awareness Program
Conducted On 5th Sep 2026

REPORT ON THE AWARENESS PROGRAMME

"RISE OF VULTURES: A CALL FOR CONSERVATION"

Date: 5th September 2026
Time: 8:30 AM onwards
Venue: College Auditorium, St. Philomena's College (Autonomous), Mysuru

---

Introduction

The Departments of Environmental Science, Botany and Zoology, in collaboration with the Internal Quality Assurance Cell (IQAC) of St. Philomena's College (Autonomous), Bannimantap, Mysuru, organized an awareness programme titled "Rise of Vultures: A Call for Conservation" on 5th September 2026 at the College Auditorium.

The programme was organized with the objective of creating awareness among students and the wider college community about the ecological significance of vultures, their declining populations, the threats faced by these important scavenging birds, and the urgent need for their conservation.

Vultures play a crucial role in maintaining ecological balance by efficiently disposing of animal carcasses and thereby contributing to sanitation, nutrient cycling and disease regulation in ecosystems. Despite their ecological importance, several vulture species have experienced severe population declines due to factors such as veterinary drugs, habitat loss, food scarcity, poisoning, electrocution and other human-induced threats.

The programme provided an important platform for students to understand the significance of vultures as **nature's natural sanitation workers** and to recognize the responsibility of society in protecting these ecologically valuable birds.

Objectives of the Programme

The awareness programme was organized with the following objectives:

1. To create awareness about the ecological importance and conservation value of vultures.
2. To educate students about the role of vultures in maintaining ecosystem health and ecological balance.

3. To highlight the major causes responsible for the decline of vulture populations.
4. To create awareness about the threats posed by habitat loss, poisoning, veterinary pharmaceuticals, electrocution and food scarcity.
5. To familiarize students with the importance of vulture conservation initiatives and habitat protection.
6. To encourage students to develop an interest in wildlife conservation and biodiversity protection.
7. To promote responsible environmental practices and community participation in the conservation of threatened species.
8. To emphasize the role of educational institutions in creating environmentally responsible and conservation-oriented citizens.

Inauguration and Dignitaries

The programme brought together distinguished personalities, faculty members and students with a common interest in wildlife and environmental conservation.

The programme was graced by Mr. Rajkumar Devaraje Urs, Managing Trustee, Wildlife Conservation Foundation (WCF), as the Chief Guest.

Prof. Dr. T. S. Harsha, Associate Professor, Department of Environmental Science, Karnataka State Open University (KSOU), was the Guest of Honour.

The programme was presided over by Rev. Dr. Lourdu Prasad Joseph, Rector, St. Philomena's College (Autonomous), Mysuru.

The programme also had the presence of:

- Dr. Ravi J. D. Saldanha, Principal
- Rev. Fr. Roshan S., Finance Officer
- Ms. Milagris Antonius, Head, Department of Environmental Science and Coordinator of the Programme
- Dr. Deepa V., IQAC Co-Coordinator and Convener
- Faculty members of the Departments of Environmental Science, Botany and Zoology
- Students participating from departments of Environmental Science, Botany and Zoology
- 

Expert Interaction on Vulture Conservation

The major highlight of the programme was the expert interaction on vulture conservation and their ecological significance.

The session focused on the important role played by vultures in maintaining healthy ecosystems. As efficient scavengers, vultures help in the rapid removal of carcasses from the environment and thereby reduce the potential spread of pathogens and diseases.

The expert session also highlighted the conservation challenges faced by vultures and the importance of understanding the relationship between human activities and wildlife populations. Students were encouraged to appreciate vultures not as undesirable birds but as essential components of natural ecosystems.

The interaction provided students with an opportunity to develop a better understanding of wildlife conservation and the importance of scientific approaches to biodiversity management.

Key Conservation Messages

The programme emphasized several important messages related to vulture conservation:

- Vultures are essential scavengers and ecological cleaners.
- Their presence contributes significantly to maintaining ecosystem health.
- Vulture population declines can have serious ecological consequences.
- Human activities and certain anthropogenic substances can pose significant threats to vulture populations.
- Protection of nesting and roosting habitats is essential for their survival.
- Responsible disposal of animal carcasses and appropriate veterinary practices are important components of vulture conservation.
- Conservation requires cooperation among wildlife organizations, government agencies, researchers, local communities and the public.
- Students and educational institutions can play an important role in creating awareness about threatened wildlife.

Student Participation and Awareness

The programme provided students with an opportunity to interact with experts and gain firsthand knowledge about vultures and wildlife conservation.

The interdisciplinary participation of students and faculty from the Departments of Environmental Science, Botany and Zoology, along with IQAC, strengthened the academic and environmental relevance of the programme.

The programme encouraged students to view biodiversity conservation from an interdisciplinary perspective and understand how ecological, biological and social factors are interconnected in wildlife conservation.

Significance of the Programme

The awareness programme was particularly significant in promoting conservation-oriented thinking among the student community. The theme “Rise

of Vultures: A Call for Conservation" emphasized that protecting biodiversity requires awareness, scientific understanding and collective action.

The programme also reinforced the commitment of St. Philomena's College to promoting environmental awareness and sustainable practices among students. Such initiatives provide students with opportunities to connect classroom learning with real-world environmental challenges.

The involvement of the Wildlife Conservation Foundation (WCF) and experts in Environmental Science added valuable practical and conservation-oriented perspectives to the programme.

Outcome of the Programme

The programme successfully:

- Increased awareness about the ecological importance of vultures.
- Helped students understand the causes behind vulture population decline.
- Highlighted the need for wildlife and habitat conservation.
- Created interest among students in biodiversity and wildlife conservation.
- Encouraged students to become ambassadors of environmental awareness.
- Strengthened interdisciplinary collaboration among the Departments of Environmental Science, Botany and Zoology.
- Reinforced the role of IQAC and academic departments in organizing socially and environmentally relevant awareness initiatives.

Conclusion

The awareness programme “Rise of Vultures: A Call for Conservation” served as an important initiative to sensitize the student community towards the conservation of vultures and biodiversity.

The programme emphasized that vultures are not merely scavenging birds but are indispensable components of healthy ecosystems. Their conservation is essential for maintaining ecological balance and natural processes.

The expert interaction and participation of students provided valuable insights into the threats faced by vultures and the need for collective conservation efforts. The programme successfully created a platform for students to understand the importance of wildlife conservation and encouraged them to contribute towards protecting biodiversity.

The collaborative efforts of the Departments of Environmental Science, Botany and Zoology and the Internal Quality Assurance Cell (IQAC) contributed significantly to the successful organization of the programme. The initiative reflects the institution's commitment to environmental education, biodiversity conservation and the development of socially responsible citizens.
