St. Philomena's College (Autonomous)
Bannimantap, Mysore-15

PG Department of Studies and Research in Journalism and Mass Communication

INTERNSHIP REPORT

On the Job Training Report of Internship at
St. Philomena's College in Partial Fulfilment of the
Requirement of

PHOTOGRAPHY

Submitted by
Anjana Varkey
B.Sc.(Physics-Mathematics)
Roll Number: SM230007
6th semester

Under the Guidance of

Dr. Venugopal Gowda M. K.
and Raviraj I.V.
Department of Mass Communication and Journalism

March 2026

LETTER FROM THE COLLEGE

Ms. Anjana Varkey is an Undergraduate student at St. Philomena's College (Autonomous), Mysore, currently pursuing a B.Sc. in the Department of Mathematics and Physics. As part of the requirements of the programs, the students are required to complete a 48-hour internship (BSCINTSEC601) in a reputed organization for the fulfilment of the degree. The objective of the internship is to develop employability skills and workplace ethics and etiquette, as well as upskill our curriculum to ensure students are career-ready. We would be grateful if you could provide her with such an opportunity by interning at your esteemed organization. We assure you of our support and cooperation.

Thank you.

Yours faithfully,

Date:

CERTIFICATE FROM THE ORGANIZATION

PERFORMANCE EVALUATION OF INTERNSHIP

Dr. Venugopal Gowda M K demonstrated exceptional tutoring skills. He was able to connect with students of varying proficiency levels, providing various supports to meet their individual needs. His approach was student-centric, focusing on building confidence and improving language skills through practical exercises and interactive sessions**.** Dr. Venugopal Gowda M.K. successfully engaged students through innovative teaching methods. He utilized interactive activities to make learning enjoyable and relevant. His efforts resulted in a noticeable improvement in student participation and interest in the subject.

Throughout his internship, Dr. Venugopal Gowda M.K. maintained a high level of professionalism. He was punctual, reliable, and consistently met deadlines. His positive attitude and willingness to take on additional tasks were highly appreciated by his colleagues and supervisors. He was open to feedback and continuously sought ways to improve his teaching methods. He participated actively in staff meetings and workshops, contributing valuable insights and showing a strong commitment to his professional development. It is recommended that Dr. Venugopal Gowda M.K. be considered for future opportunities within the institution, given his outstanding performance and potential for further growth. His contributions have set a high standard, and he is well- prepared for advanced roles in education and content development. We extend our heartfelt appreciation to Dr. Venugopal Gowda M.K. for his hard work, enthusiasm, and dedication during his internship. We wish him all the best in his future endeavors and are confident that he will continue to excel in his career.

Dr. Venugopal Gowda M.K.

Head of the Department of Mass Communication and Journalism

DECLARATION BY THE INTERN

I, **Anjana Varkey**, do hereby declare that this final report is a record of the six-days internship work carried out by me at St. Philomena's College under the guidance of **Dr. Venugopal Gowda M.K.,** and **Mr. Raviraj I.V.**. This report has been submitted to the Department of Mass Communication and Journalism at St. Philomena's College (Autonomous), Mysore, towards the requirement of an **Internship (BSCINTSEC601) as part of the mandatory requirement for the degree in B. Sc.** declares that this report has not been submitted for the award of any degree or diploma to any other university or institution.

Date:

INTERNSHIP CERTIFICATE

CERTIFICATE BY THE GUIDE

This is to certify that **Anjana Varkey** has appreciably completed a month's internship at St Philomena's College under my guidance. The intern consulted me at regular intervals during her internship to report on the progress of the internship undertaken. All that she has stated in this report is true to the best of my knowledge and belief.

Date:

Signature of the Guide

ACKNOWLEDGEMENT

I thank St. Philomena's College, Mysore, for allowing me to engage in an internship in the field of Photography, a rich experience I could not have gained if not for this internship.

I take this opportunity to thank the **Rector, Rev. Fr. Dr. Lourdu Prasad Joseph**, and **Dr. Ravi JD Saldanha, Principal** for the opportunity provided by the institution.

I thank **Dr. Venugopal Gopal M.K.,** the Head of the Department of Journalism and Mass Communication for his encouragement and support.

I thank the Program Coordinator of the UG, **Ms. Juhie Singh P.**, for providing us with his guidance.

I thank our Deen of science **Prof. R. Britto Dominic Rayan** Sir, for his constant guidance.

Words cannot express how much I owe to the unstinted support rendered by the In-house Internship in Journalism and Mass Journalism at St. Philomena's College. This would not have been possible without the encouragement and valuable guidance she extended throughout the internship.

I thank our **Prof. Thomas Gunaseelan**, Sir, head of the Department of Physics, for his constant motivation.

I would also like to thank **Mrs. Shruthi Menezes**, ma'am, for her constant support and encouragement throughout the internship.

With immense joy and humility, I also thank **Dr. Venugopal Gowda and Raviraj I. V.**, for sparing their valuable time with their most precious guidance, constant inspiration, and counsel at the various stages of this task.

I would like to extend sincere and wholehearted gratitude to all who have supported me during this internship.

INTRODUCTION

The seven-day photography internship was conducted at St. Philomena's College, under the Department of Journalism and Mass Communication (PG). This internship was designed to provide students with a comprehensive understanding of the fundamentals of photography, including various techniques, lighting methods, types of photography, and camera
handling skills. The internship was conducted from 23rd March to 31st March,2026.

The program was carried out under the guidance of Dr. Venugopal Gowda and Raviraj I. V., whose expertise and mentorship played a significant role in enhancing the learning experience. The internship was attended by 17 students from different academic streams, creating a collaborative and engaging environment for learning.

Each day's session was scheduled from 9:30 AM to 4:30 PM and included both theoretical instruction and practical assignments. Students were given opportunities to apply various photography techniques through hands-on activities, including outdoor visits to locations such as a market and a lake, which provided real-world exposure to different photography settings.
The internship concluded with the organization of a photography exhibition, where participants showcased their work and demonstrated the skills they had acquired during the program.

This report presents a detailed account of the internship, including the introduction, objectives, day-wise activities, classroom sessions, outdoor visits, skills acquired, challenges faced, and selected photographs captured during the internship. Overall, the internship served as a valuable platform for developing both technical competence and creative expression in photography.

OBJECTIVES

1.To understand the fundamentals of photography

- To gain knowledge about the basic concept and meaning of photography.
- To understand the evolution and importance of photography in media and communication.
- To identify different types of photography such as portrait, landscape, wildlife, and street photography.
- To learn about various types of cameras and their basic functions.

2. To learn basic camera settings

- To understand the functions of shutter speed, aperture, and ISO.
- To learn how these settings affect exposure and image quality.
- To identify appropriate settings for different lighting conditions.
- To develop the ability to manually control camera settings for better results.

3. To apply the principles of exposure

- To understand the concept of the exposure triangle.
- To learn how to balance aperture, shutter speed, and ISO effectively.
- To avoid overexposed and underexposed images.
- To capture images with proper brightness and clarity in different conditions.

4. To develop composition skills

- To understand basic composition rules like the rule of thirds.
- To learn techniques such as leading lines, symmetry, and framing.
- To improve the visual appeal and storytelling of photographs.
- To develop creativity in arranging elements within a frame.

5. To understand the importance of lighting

- To learn the role of natural and artificial lighting in photography.
- To understand how light affects mood, tone, and texture.
- To identify the best time and conditions for photography.
- To apply lighting techniques to enhance image quality.

6. To capture well-composed photographs

- To apply learned techniques in real-time photography.
- To combine camera settings, composition, and lighting effectively.
- To practice capturing clear, sharp, and meaningful images.
- To develop confidence in handling the camera independently.

7. To learn basic photo editing techniques

- To understand the importance of post-processing in photography.
- To learn basic editing tools for adjusting brightness, contrast, and color.
- To enhance the overall quality and presentation of photographs.
- To develop skills in refining and finalizing images for display or exhibition.

DAY-WISE REPORT

Day-1: 23rd March 2026

The first day of the seven-day internship commenced with an inaugural program held at conference hall of P.G. block of St. Philomena's College, Mysore at 9.30 AM. The program was formally inaugurated by Rev. Fr. Lourde Prasad Joseph, Rector of the college. The event
was graced by the presence of Dr. Ravi J. D. Saldana, Principal, Mr. Ronald Prakash Kutino,
Vice Principal, Mr. Thomas Guneseelan, IQAC Coordinator, Ms. Juhi Singh, Internship Coordinator, and Mr. Noor Mubashir, PG Coordinator, along with other respected faculty
members and fathers from various departments.

The inauguration program lasted for approximately one hour, during which the students were provided with general instructions and an overview of the internship. Various internship options such as Photography, Baking, Computer Science, and Entrepreneurship were introduced.

Following the inaugural session, we proceeded to the Department of Journalism and Mass Communication, where we met the Head of the Department, Dr. Venugopal Gowda and another faculty Raviraj I. V.. Venu guided us to the department studio, where seating arrangements were made, and an introductory session was conducted. A total of 17 students from different academic streams participated in the photography internship. Each student introduced themselves, creating an interactive and engaging environment.

As part of the initial activity, we were shown photographs from previous internships. We were asked to carefully observe and analyze these images, select a few, and explain the reasons for our choices. This activity helped us develop critical thinking and visual interpretation skills. Venu sir also introduced photography as an art form, emphasizing its creative and expressive nature. The morning session continued with a theoretical introduction to the fundamentals of photography, including its basic concepts, meaning, evolution, and importance in media and communication. We were also introduced to different types of photography.

After the lunch break, the afternoon session was handled by Ravi sir, who taught us about different types of cameras and their functions. Following this, we were given a practical assignment to apply our learning. We

were asked to go outdoors and capture photographs of nature using basic techniques. Each student captured four photographs and later presented them in class. We explained the ideas behind our pictures and received feedback, which helped us understand our strengths and areas for improvement.

Additionally, the first day of the internship provided a strong foundation in both theoretical and practical aspects of photography. I learned that photography is not just about capturing images but is also a form of art and expression. I gained basic knowledge about the meaning, evolution, and significance of photography in media and communication. I also understood different types of photography and was introduced to various types of cameras and their functions. The activity of analyzing previous photographs helped me develop observation and interpretation skills. Furthermore, the practical assignment of capturing nature photographs enhanced my creativity and gave me initial hands-on experience in applying basic photography techniques.

Day-2: 24th March 2026

The second day of the internship began at 9:30 a.m. and concluded at 4:30 p.m. The sessions were highly informative and focused on understanding the core technical aspects of photography, particularly camera settings and their practical applications.

The morning session was handled by Venu Sir, who introduced us to the fundamental camera settings—shutter speed, aperture, and ISO. Shutter speed refers to the length of time the camera sensor is exposed to light. A faster shutter speed captures motion sharply, while a slower shutter speed allows more light to enter but can result in motion blur. Aperture refers to the opening of the lens, which controls the amount of light entering the camera. A wider aperture (lower f-number) allows more light and creates a shallow depth of field, resulting in a blurred background, whereas a narrower aperture (higher f-number) allows less light and keeps more of the image in focus. ISO determines the sensitivity of the camera sensor to light. A lower ISO produces clearer images with less noise, while a higher ISO increases brightness but may introduce grain or noise in the image.

We also learned how these three elements work together to control exposure, which is the overall brightness or darkness of an image. Proper balance between shutter speed, aperture, and ISO is essential to achieve a well-exposed photograph. Incorrect settings can lead to overexposed images (too bright) or underexposed images (too dark), thereby affecting image quality.

The afternoon session was conducted by Ravi Sir, who further explained the application of these settings in different lighting conditions. He guided us on selecting appropriate camera settings for various environments such as bright sunlight, low-light conditions, and indoor settings. For instance, in bright conditions, a lower ISO and faster shutter speed can be used, whereas in low-light situations, a higher ISO or wider aperture may be required. He also emphasized the importance of using manual mode to gain full control over camera settings for achieving better and more creative photographic results.

After 3:30 p.m., we had a practical session where we went around the college campus to capture photographs focusing on patterns and shapes. This activity helped us apply the concepts we had learned earlier in the day. We explored different angles, compositions, and lighting conditions to identify interesting patterns in architecture and surroundings, which enhanced our observation and creative skills.

Overall, the second day enhanced my understanding of the relationship between shutter speed, aperture, and ISO, and how they collectively affect exposure and image quality. I learned how to adjust these settings according to different lighting conditions and developed confidence in handling the camera manually to capture better photographs.

Day-3: 25th March 2026

The third day of the internship was both engaging and experiential, focusing on the principles of exposure and their practical application. The day began with a morning session conducted by Venu Sir, who introduced us to the concept of the exposure triangle. He explained how aperture, shutter speed, and ISO are interconnected and must be balanced effectively to achieve a well-exposed photograph.

During the session, we gained a clear understanding of how each element influences exposure. Aperture controls the amount of light entering the lens and also affects depth of field. Shutter speed determines how long the camera sensor is exposed to light and influences motion capture. ISO controls the sensitivity of the sensor to light, affecting brightness and image noise. Venu Sir also explained the difference between properly exposed, overexposed, and underexposed images, and guided us on how to maintain the right balance to achieve proper brightness and clarity under different lighting conditions.

Following the theoretical session, we were given an assignment to explore the college campus and capture photographs by applying different exposure techniques. The task focused on identifying a subject, using ISO effectively, and maintaining proper exposure. This activity helped us experiment with camera settings and understand how to adjust them in real-time based on lighting and composition.

In the afternoon session, we gathered to review and analyze the photographs taken by each student. This discussion allowed us to understand different perspectives and techniques used by others. By evaluating each image, we learned how variations in settings and composition can produce different results, and we gained insights into improving our own photography skills.
Later in the evening, at around 4:30 p.m., we visited Kukkarahalli Lake for an outdoor photography session. At the lake, we observed the natural surroundings and captured photographs during sunset. This session gave us the opportunity to work in changing natural light and practice capturing different moods, reflections, and silhouettes. We focused on adjusting exposure settings to suit the golden hour lighting, which enhanced the overall quality and aesthetics of our images. The session concluded at around 6:45 p.m., after which we dispersed.

Overall, the third day was highly enriching. I learned how to balance the exposure triangle effectively, identify proper exposure, and adjust camera settings according to different lighting conditions. The practical assignments and photo analysis improved my observational and technical skills, while the outdoor session at the lake enhanced my creativity and ability to capture natural beauty.

Day-4: 26th March 2026

The fourth day of the photography internship commenced with a morning session at 9:30 a.m., conducted by Venu sir. The session primarily focused on enhancing our understanding of composition skills and the effective use of lighting in photography, both of which are essential for producing visually appealing and meaningful images.

During the session, we were introduced to various principles of composition. Composition refers to the art of arranging elements within a frame in a way that guides the viewer's eye and conveys a clear message or story. One of the key concepts discussed was the Rule of Thirds, which involves dividing the frame into a grid of nine equal parts and placing the subject along these lines or at their intersections to create balance and interest. In addition, techniques such as leading lines, symmetry, and framing were explained in detail. Leading lines help direct the viewer's attention toward the subject, while symmetry creates a sense of harmony and order. Framing involves using elements within the scene to enclose the subject and draw focus to it. These techniques collectively contribute to improving the visual appeal and storytelling quality of photographs.

The session also emphasized the importance of creativity in composition. We were encouraged to experiment with different angles, perspectives, and arrangements of elements within the frame to produce unique and engaging images. Furthermore, the role of lighting was discussed, highlighting how natural and artificial light influence the mood, tone, and clarity of an image.
The afternoon session was conducted by Ravi Sir and focused on practical and advanced aspects of photography, particularly mood, texture, and lighting techniques. We learned how lighting plays a crucial role in creating different moods in photographs. For instance, soft lighting can produce a calm and pleasant mood, while harsh lighting can create dramatic effects. The concept of texture was also explained, showing how light can highlight surface details and add depth to images.

In addition, we were taught about the best time and conditions for photography, such as the golden hour, when natural light is soft and warm, making it ideal for capturing high-quality images. Various lighting techniques were demonstrated to enhance image quality, including adjusting light direction, intensity, and angle.

A significant part of the afternoon session involved practical exposure to studio photography. We were introduced to studio equipment such as cameras, studio lights, reflectors, and stands. Under guidance, we practiced taking portrait photographs using these tools. The use of reflectors was particularly emphasized, as

they help in controlling shadows and evenly distributing light on the subject. This hands-on experience allowed us to understand how to set up and manage lighting in a controlled environment.

Overall, the fourth day of the internship provided a comprehensive understanding of both theoretical and practical aspects of photography. I learned how to apply composition techniques to create visually appealing images and how lighting can be used creatively to influence mood and texture. The practical session enhanced my skills in handling studio equipment and capturing portraits effectively. This day greatly contributed to improving my creativity, technical knowledge, and confidence in photography.

Day-5: 27th March 2026

The fifth day of the photography internship was dedicated to a field visit and practical application of the concepts learned in previous sessions. Early in the morning, I reached KR Market at 6:30 a.m., where we assembled along with our mentor, Venu sir. We were then divided into small groups to explore the market and capture photographs using the techniques we had studied earlier.

The visit to KR Market provided a rich and dynamic environment for photography. I explored different sections of the market, including areas where flowers were sold in large quantities, displaying vibrant colors and patterns. The wholesale sections and packed-down goods added a unique visual texture, while the vegetable and fruit sections offered a variety of natural colors and compositions. The early morning atmosphere presented a blend of activity and calmness, allowing us to capture elements such as busy vendors, birds, subtle moments of silence, and the soft natural light of the golden hour. This experience helped me apply composition techniques, lighting principles, and storytelling skills effectively, and I was able to capture several visually appealing photographs.

We spent several hours at the market observing and photographing different scenes. After completing the fieldwork, we regrouped and later returned to the college, assembling again at 10:30 a.m. for the next session. During this session, we reviewed and discussed the photographs taken by each group, which helped us understand different perspectives and creative approaches.
Before beginning the editing process, we attended a session conducted by Venu Sir and Ravi Sir, where we were introduced to basic photo editing techniques. We learned how to enhance images by adjusting brightness, contrast, color balance, and sharpness while maintaining the natural quality of the photographs. Following this, we selected and edited our best images under guidance.

After editing, we proceeded with printing the finalized photographs. The session also involved detailed planning for the upcoming exhibition scheduled for the next day. We organized the photographs and discussed the arrangement, layout, and presentation style to ensure an effective display.

Following the completion of these preparations, a group of four students, including myself, took the initiative to invite participants for the exhibition. We visited various departments within the college and personally invited students, faculty members, and guests. We also approached invited guests and informed them about the exhibition, ensuring wider participation and awareness.
We remained on campus until 9:00 p.m., working collectively to complete all the necessary arrangements for

the exhibition. After ensuring that everything was properly organized and finalized, we concluded the day and left.

The fifth day was highly productive and provided valuable practical exposure. I learned how to apply photography techniques in real-life situations, observe details such as color, texture, and light, and capture meaningful images. Additionally, I gained experience in photo editing, printing, teamwork, communication, and event preparation. This day enhanced my creativity, technical skills, and confidence, while also giving me a complete understanding of the process from capturing photographs to preparing them for exhibition.

Day-6: 28th March 2026

The sixth day of the photography internship was marked by the much-awaited photography exhibition, which served as the culmination of all the learning and efforts undertaken during the internship. The exhibition commenced with an inaugural function at 9:30 a.m., attended by esteemed dignitaries including the Rector, Father Dr. Louis Prasad Joseph, along with the Principal, Vice Principal, IQAC Coordinator, PG Coordinator, and Internship Coordinator.

The inauguration was conducted formally, and it provided an excellent platform to showcase our work. During the inaugural function, I was also given the opportunity to share my experience of the internship. This was a valuable moment, as it allowed me to reflect on my learning journey and express my thoughts on the skills and knowledge I had gained throughout the program.

Following the inauguration, visitors, guests, faculty members, and students explored the exhibition. The photographs displayed reflected a wide range of themes, techniques, and creative perspectives developed during the internship. The exhibition continued until 1:30 p.m., during which we interacted with visitors, received feedback, and discussed our work. This interaction helped us understand how our photographs were perceived by others and gave us confidence in presenting our creative work.

The entire experience was enjoyable and fulfilling, as we shared our experiences and appreciated each other's work. It created a sense of accomplishment and teamwork among all the participants.

After the exhibition concluded at 1:30 p.m., we collectively worked on dismantling the setup. We cleaned the exhibition space and rearranged all the materials and equipment used for display, ensuring everything was returned to its proper place.

The sixth day was a memorable and rewarding experience, as it provided an opportunity to present my work to a wider audience. I learned the importance of presentation, communication, and audience engagement in photography. Sharing my work and experiences boosted my confidence and gave me a sense of achievement. Overall, it was a great experience to showcase my creativity and artistic expression to others.

Day-7: 31st March 2026

The seventh and final day of the photography internship began at 9:30 a.m., with all participating students assembling for a reflective and interactive session. This session was designed to provide an opportunity for students to share their individual experiences and learning outcomes from the entire internship program.

During the session, each student actively participated in sharing how the internship had contributed to their development in photography. We discussed various aspects such as composition techniques, lighting, exposure, storytelling, and practical applications learned throughout the previous days. The discussion also included a constructive evaluation of the internship, where students expressed their views on the strengths of the program as well as areas for improvement. This exchange of ideas created a collaborative learning environment and allowed us to gain insights from one another's experiences.

The session continued until the afternoon, encouraging open communication and reflection. After the lunch break, we focused on the preparation of the internship report. Guidance was provided regarding the structure and content of the report, and we began organizing our daily activities and learning into a formal format. This process helped in consolidating our knowledge and documenting our overall experience in a systematic manner.

By the end of the day, we had completed the essential work related to the report preparation. The internship formally concluded with students dispersing after a meaningful and productive final session.

The final day of the internship was reflective and insightful, allowing me to review and consolidate all that I had learned throughout the program. It helped me understand my progress, recognize my strengths, and identify areas for further improvement. Preparing the internship report also enhanced my ability to organize and present my learning in a structured manner. Overall, the day provided a meaningful conclusion to the internship and strengthened my confidence and interest in photography.

CLASSROOM LEARNING

- Gained understanding of the exposure triangle – aperture, shutter speed, and ISO.
- Learned how to balance exposure to achieve proper brightness and clarity in images.
- Studied composition techniques such as Rule of Thirds, leading lines, symmetry, and framing.
- Developed skills in visual storytelling through effective arrangement of elements.
- Understood the importance of creativity and perspective in photography.
- Learned about natural lighting and its use during different times of the day (e.g., golden hour).
- Explored artificial lighting and its role in controlled environments like studios.
- Gained knowledge about light direction, intensity, and shadows to enhance image quality.
- Understood how mood and texture are influenced by lighting.
- Learned studio setup and arrangements for photography sessions.
- Understood the use and placement of studio lights for proper illumination.
- Practiced different lighting arrangements (key light, fill light, backlight).
- Learned how to use reflectors to control shadows and enhance subject lighting.
- Gained knowledge of background setup and positioning for portrait photography.
- Practiced handling camera equipment and accessories in a studio environment.
- Understood how to create different moods using studio lighting techniques.
- Learned proper subject positioning and posing for portrait shots.
- Learned basic photo editing techniques to enhance image quality.
- Practiced adjusting brightness, contrast, saturation, and sharpness.
- Understood color correction and maintaining natural tones in photographs.
- Learned the importance of selecting the best images for final output.
- Gained knowledge about preparing images for printing and exhibition.
- Developed the ability to analyze photographs and identify strengths and areas for improvement.
- Built a strong foundation for applying concepts during practical sessions, field visits, and studio work.

OUTDOOR VISITS

Kukkarahalli Lake

The visit to Kukkarahalli Lake provided a peaceful and natural environment, which was highly suitable for practicing nature and landscape photography. Surrounded by greenery, water bodies, and birdlife, the location allowed me to observe and capture various natural elements. I focused on photographing birds, reflections in water, plants, and scenic views.

This visit helped me understand the importance of natural lighting, especially how soft light enhances the beauty of nature. I practiced composition techniques such as framing, leading lines, and maintaining balance within the frame. The calm atmosphere also taught me patience, as capturing birds and natural moments required timing and careful observation.

Learnings:
Through this visit, I improved my ability to capture detailed and well-composed images in a natural setting. I became more attentive to small details, lighting conditions, and angles. It also helped me develop a sense of calm observation, which is important in nature photography.

K.R. Market

The visit to KR Market offered a completely contrasting experience, filled with activity, colors, and human interactions. The early morning session allowed me to capture the market during its most active time, along with the soft lighting of the golden hour.

I explored different sections of the market, including flower stalls, vegetable vendors, and fruit sellers. The vibrant colors and busy environment provided excellent opportunities to practice color composition, texture, and street photography. I also captured candid moments of people, showcasing real-life expressions and daily activities.

This visit helped me apply techniques such as the exposure triangle, composition rules, and effective use of lighting in a dynamic and fast-moving environment.

Learnings:

Through this experience, I became more confident in handling the camera in crowded and fast-paced situations. I improved my ability to quickly adjust settings, capture spontaneous moments, and tell stories through photographs. It also enhanced my creativity and observational skills, allowing me to see beauty in everyday scenes.

SKILL ACQUIRED

Camera Handling: Learned how to operate DSLR and mirrorless cameras efficiently, adjust settings such as aperture, shutter speed, and ISO, and switch between modes for different shooting conditions.

Exposure Control: Developed the ability to balance the exposure triangle to capture properly lit images, avoid overexposure or underexposure, and adapt to varying lighting conditions.

Composition Techniques: Gained skills in arranging subjects and elements within a frame using Rule of Thirds, leading lines, symmetry, framing, and visual balance to create aesthetically pleasing photographs.

Lighting Management: Learned to work with natural light (golden hour, soft light) and artificial light (studio lights, reflectors, flash) to enhance mood, texture, and depth in images.

Portrait Photography: Practiced posing, subject positioning, and use of studio setups to capture expressive and well-composed portraits.

Creative Vision & Storytelling: Developed the ability to tell stories through photographs, capturing emotion, action, and narrative in both outdoor and studio settings.

Observation Skills: Improved attention to details such as textures, colors, light direction, patterns, and moments to capture compelling images.

Photo Editing & Post-Processing: Learned to use editing techniques like brightness, contrast, saturation, color correction, and sharpening to enhance image quality while maintaining natural appearance.

Field Photography Skills: Gained experience in dynamic environments such as markets and natural settings, learning to quickly adjust settings, compose shots, and capture spontaneous moments.

Studio Photography & Equipment Management: Learned studio arrangements, including lighting setup, background selection, reflector use, and handling of studio equipment for professional results.

Creativity & Innovation: Developed the ability to experiment with angles, perspectives, and lighting to produce unique and visually engaging photographs.

Teamwork & Collaboration: Practiced working in groups during field visits and exhibition preparations, coordinating tasks, and contributing effectively to collective goals.

Event & Exhibition Planning: Learned organizing and presenting photographs for exhibitions, inviting guests, and managing displays to professionally showcase work.

Critical Evaluation: Developed the skill to analyze photographs, identify strengths and areas for improvement, and make informed decisions during editing and selection.

Time Management & Discipline: Learned to plan shoots, complete editing, and exhibition preparation within deadlines, maintaining professionalism throughout the internship.

CHALLENGES FACED

Adapting to Different Lighting Conditions:
Capturing images in varying natural and artificial lighting was challenging initially. I had to quickly adjust camera settings and angles to ensure proper exposure and avoid unwanted shadows or highlights.

Handling Dynamic Outdoor Environments:
During field visits, especially at KR Market, the fast-moving crowd and busy surroundings made it difficult to frame shots and capture spontaneous moments without distractions.

Managing Equipment:
Operating cameras, tripods, reflectors, and studio lights required careful handling. Ensuring proper setup and avoiding damage to equipment was sometimes challenging, particularly during practical sessions.

Capturing the Right Moment:
Photographing birds, moving subjects, or candid moments demanded patience and precise timing to achieve sharp, well-composed images.

Balancing Composition and Creativity:
Combining technical rules of composition with creative perspectives was sometimes difficult, especially while trying to make images visually engaging and unique.

Learning Post-Processing Skills:
Editing photographs to enhance colors, sharpness, and overall quality while maintaining a natural look was initially challenging and required practice and guidance.

Time Management During Field Visits:
Coordinating photography, exploring locations, and capturing all intended subjects within limited time frames required planning and efficiency.

Studio Lighting Arrangements:
Setting up studio lights, arranging reflectors, and adjusting lighting angles for portraits demanded technical understanding and experimentation to achieve desired results.

Managing Large Number of Photographs:

Selecting the best images from hundreds of clicks for editing and exhibition required careful evaluation and decision-making.

Interacting with People for Candid Shots:

Capturing street or market photography involved approaching subjects or photographing them discreetly, which was initially intimidating but gradually improved with practice.

Organizing the Exhibition:

Planning the exhibition layout, arranging photographs, and inviting guests required teamwork, coordination, and attention to detail to ensure a professional presentation.

CONCLUSION

The seven-day photography internship was an enriching and transformative experience that significantly enhanced both my technical and creative skills in photography. Over the course of the program, I gained a strong foundation in photography principles, practical exposure, and professional presentation.

During the classroom sessions, I learned essential concepts such as the exposure triangle (aperture, shutter speed, ISO), composition techniques (Rule of Thirds, leading lines, symmetry, and framing), lighting management, and visual storytelling. These theoretical sessions prepared me to apply the knowledge effectively during practical exercises and outdoor shoots. We also explored studio setups, including lighting arrangements, use of reflectors, background setups, and camera equipment handling, which helped me understand controlled environment photography. Additionally, I gained skills in photo editing, including adjustments in brightness, contrast, color balance, and sharpening, along with preparing photographs for printing and exhibition.

The two outdoor visits Kukkarahalli Lake and KR Market in Mysore were instrumental in applying classroom knowledge in real-world situations. Kukkarahalli Lake offered a serene environment to practice nature and landscape photography, while KR Market provided a dynamic and vibrant setting to explore street, candid, and color-rich photography. These experiences improved my ability to handle diverse lighting conditions, compose shots creatively, and capture meaningful moments with precision.

The internship also included practical exposure in studio photography, where I learned to arrange lights, use reflectors, pose subjects, and manage equipment professionally. Planning and organizing the exhibition further strengthened my skills in teamwork, coordination, and professional presentation, giving me the opportunity to showcase my work to guests, faculty, and peers.

Throughout the internship, I faced challenges such as adjusting to varying lighting, handling fast-moving subjects, managing equipment, and organizing large numbers of photographs. Overcoming these challenges enhanced my problem-solving abilities, patience, and confidence in photography.

By the end of the program, I not only improved technically but also developed a creative vision and storytelling ability, learned to analyze and edit photographs critically, and gained exposure to professional

photography practices. The final exhibition and reflection sessions allowed me to share my learning, receive feedback, and appreciate the efforts of my peers.

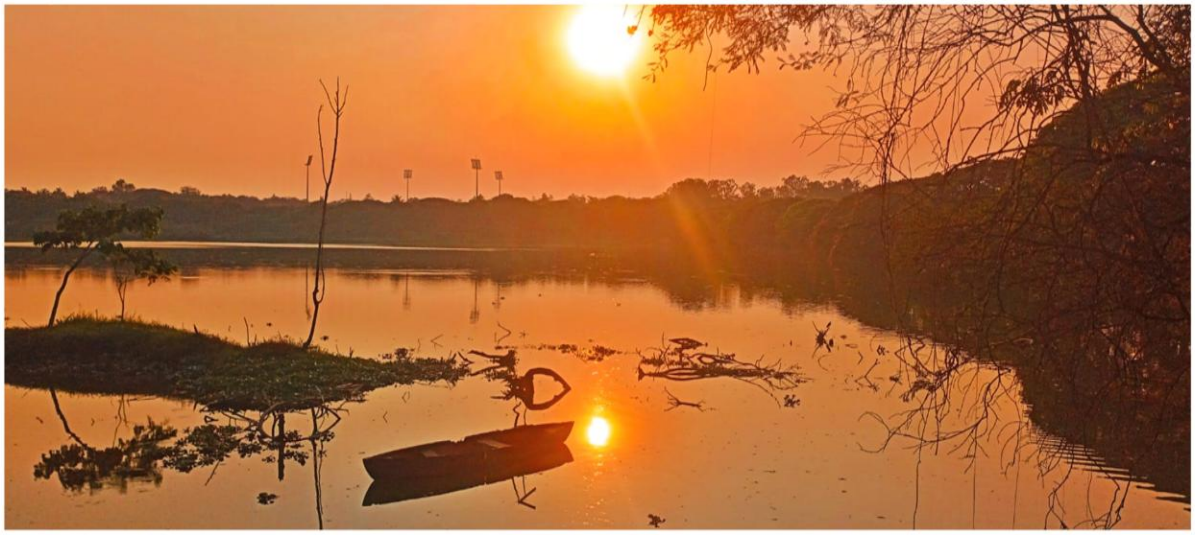

Overall, this seven-day internship provided a comprehensive learning journey, combining theoretical knowledge, practical skills, creative exploration, and professional experience. It has strengthened my confidence, improved my photography skills, and inspired me to continue exploring and developing my passion for photography.

APPENDICES

APPENDIX A: KUKKARAHALLI LAKE PHOTOGRAPHY – 25TH MARCH(EVENING)

Captured during the evening golden hour, this session focused on nature photography, reflections, and experimenting with natural light.

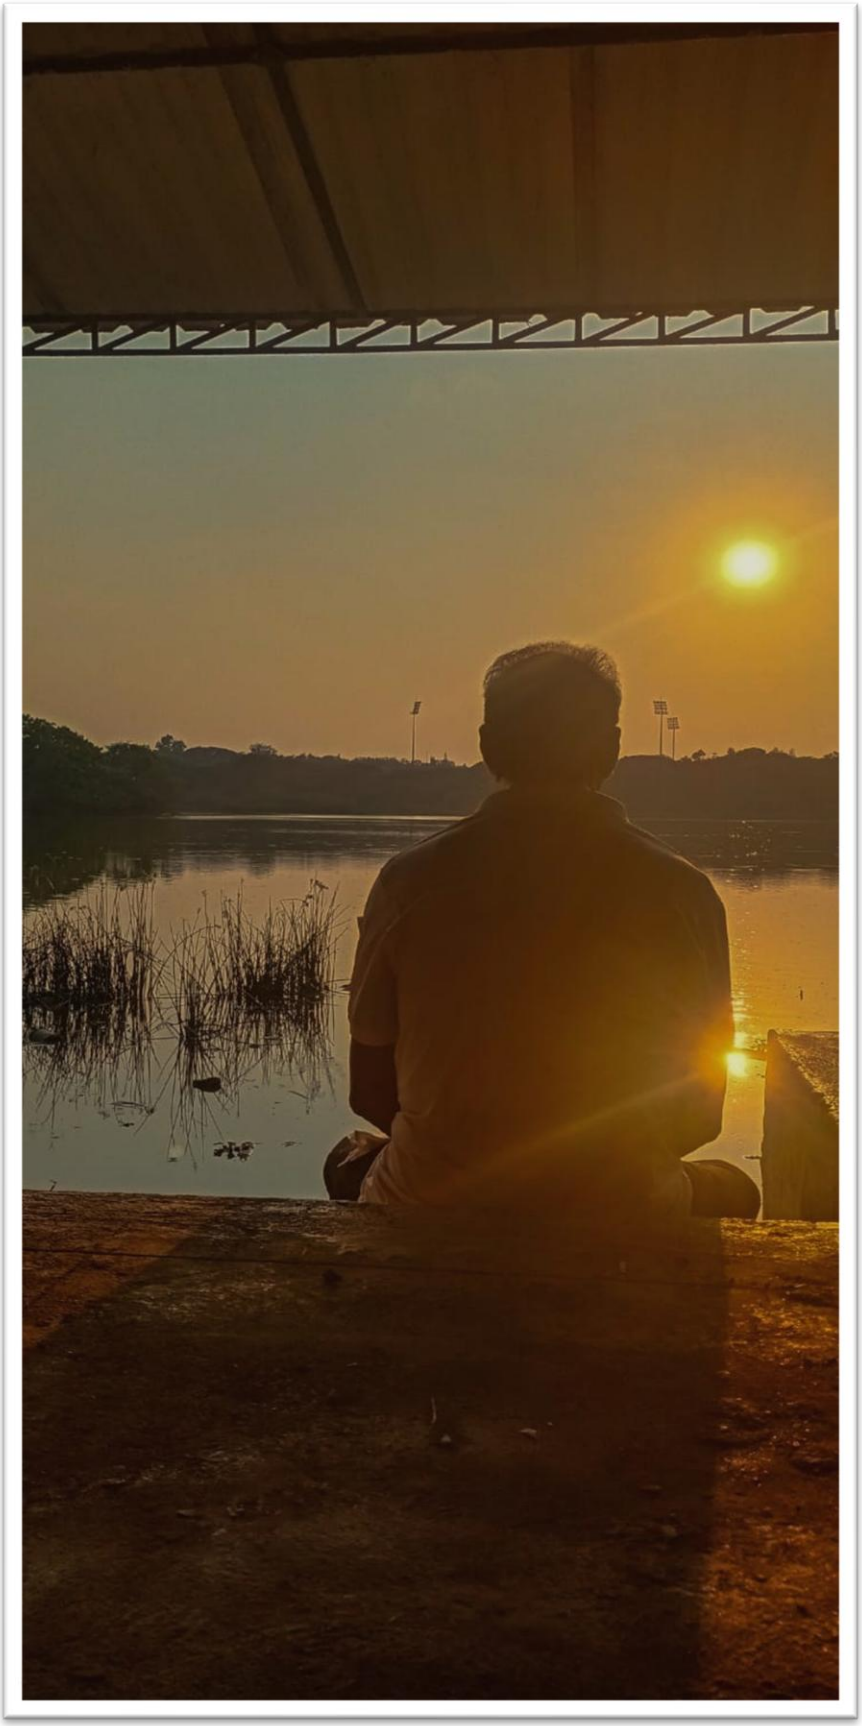

GOLDEN HOUR WHISPERS OVER STILL WATERS

NATURE'S TINY WORRIOR

LOST IN THE CALM OF SUNSET

APPENDIX B: KR MARKET PHOTOGRAPHY – 27TH MARCH (MORNING)

This early morning field visit focused on human interest, capturing vibrant markets, motion, emotion, and storytelling through candid frames.

THE MORNING MEETING

YELLOW IN MOTION

SEARCHING THE LEMON BASKET TOGETHER TILL NOW

APPENDIX C: ON-CAMPUS PHOTOGRAPHY ACTIVITIES

We explored themes like "within the frame", "pattern", and "ethnic elements" around our college campus, focusing on composition and storytelling through architectural and candid shots.

SHOWING WITHIN THE FRAME

PATTERN IN GREEN

APPENDIX D : STUDIO PHOTOGRAPHY-LIGHTING AND DSLR PRACTICE

Learned studio lighting techniques and adjustment of lights and reflector for photography.

THREE- POINT LIGHTING SETUP

APPENDIX E: EXHIBITION SETUP & INAUGURATION

The final day of the internship culminated in an exhibition of our best photographs. We organized the gallery, arranged frames, and presented our work to the faculty and guests.

ARRANGING PHOTO IN THE EVENT.

INAUGURATING THE MOBILE PHOTOGRAPHY EXHIBITION

INAUGURAL SPEECH BY RECTOR

OVERALL EXPERIENCES

The seven-day photography internship was an exceptionally enriching and transformative experience that significantly enhanced my technical, creative, and observational skills in photography. Throughout the program, I gained practical knowledge and hands-on exposure that helped me understand photography as both a technical craft and an art form.

During the internship, I learned to effectively use the Pro mode on a phone, allowing me to manually control ISO, shutter speed, focus, and other settings to capture high-quality images in various lighting conditions. I developed a keen sense of observation, which enabled me to identify and capture compelling moments, compositions, and details that I had previously overlooked.

The internship provided in-depth learning of photography techniques, including composition, lighting management, visual storytelling, and studio photography. Applying these skills in real-world settings, such as Kukkarahalli Lake and KR Market, allowed me to practice landscape, street, and candid photography while adapting to dynamic environments. Additionally, participating in the exhibition offered valuable experience in presenting and showcasing my work professionally, as well as engaging with visitors and peers to share insights and creative ideas.

Beyond technical and creative development, the internship offered opportunities to interact with supportive mentors and fellow participants, fostering a collaborative and inspiring learning environment. These interactions enhanced my confidence, teamwork abilities, and appreciation for different perspectives in photography.

Overall, the internship not only strengthened my practical skills and creative vision but also inspired me to explore photography more deeply as a form of artistic expression. I am grateful for the guidance, mentorship, and experiences provided during this program, which have collectively contributed to both my personal and professional growth.

THANKYOU.
